

Second Opinions: MORE Health

MORE Health provides an easy way for members to access critical second opinions, from the physician specialists associated with top institutions.

Why I recommend MORE Health:

- Up to 88% of second opinions result in major changes to diagnoses or recommended treatments, yet many people don't know how to access them without help.
- MORE Health bridges that gap, offering coordinated access to second opinions from more than 10,000 of the world's leading specialists at top medical institutions across the United States.
- Case Managers act as patient advocates, collecting medical history, test results, and medical imaging from treating physicians.
- Based on patient records, the most appropriate physician specialist is selected and given the case to review.
- The physician specialist collaborates directly with a patient's treating doctor through a HIPAA-compliant Physician Collaboration Platform™.
- The specialist and treating physician jointly develop a correct diagnoses and optional treatment plans, along with a final report.
- Once the process is complete, the patient meets with their treating physician to review their individualized report and discuss treatment options.
- Alternatively, if requested, physician specialists can review an existing diagnosis and develop an independent second opinion.
- A Patient Portal provides instant access to medical records, plus the patient can track progress throughout the process.
- Follow-up support is available to the patient for up to 6 months after the initial process is complete.
- MORE Health minimizes unnecessary over-treatment and reduces waste due to the treatment of misdiagnosed conditions.
- They serve more than 1 million employee benefits and insurance subscribers worldwide.
